

# What is new on the T4A GPS Maps – Traveller's Africa 13.10

T4A GPS Maps 13.10 comes preloaded on a **2Gb micro SD** card with standard adapter, ready for **Plug & Navigate**.

This SD card can be used on most map capable **Garmin** units and has been tested with latest Nuvi models as well. ***This product is not compatible to iGO in car navigation systems, Android or iOS devices. For these platforms we have separate products.***

The SD card also contains **installation files for PC and Mac** users who want to install the maps on their computers for trip planning or for transferring maps to older Garmin units such as the 276c, 76csx, eTrex, etc.

The map growth is organic in nature. We processed **452 data submissions for version 13.10**. These data submissions not only contribute more roads and POI's to the map, it also improves the quality of existing data by means of corrections. The overall road coverage has increased by **7%** from 13.05.

In **Namibia** we have added 200 new district roads as well as new river bed trails. Johan Snyman once again provided some excellent feedback on roads and river crossings as part of his research for his new book on Damaraland.

Jolandi Rust, the intrepid bike traveller, submitted all of her accommodation points in **West Africa**, which we have added to the map.

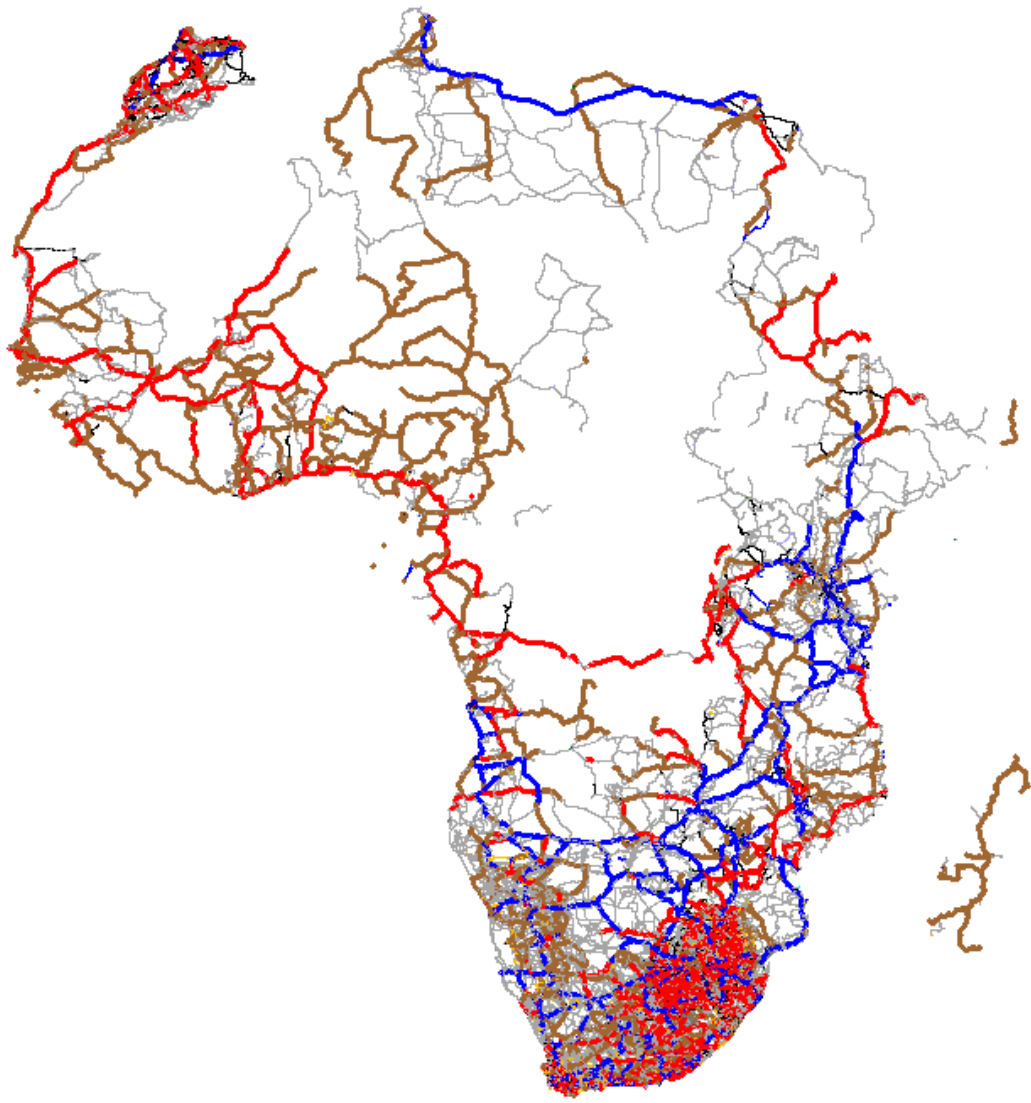

Martin Poppen submitted tracks which for the first time on T4A maps connects East Africa to Kinshasa in the **DRC**.

Andrzej Beilecki provided exciting new data for **Chad**.

In **Kenya** we have added street level detail for Mombasa and a few other towns.

## Map Coverage
